

The Greek American Rehabilitation and Care Centre, Inc.

www.greekamericancare.org

Project Location: Wheeling, IL
Amount Requested: Maximum permitted by Foundation
Project Budget: \$199,930
Project Director:
Contact Person: Patricia Gerbanas

Organization: The GARCC takes in the sick and elderly of our community and provides them with restorative, skilled and long-term health care in a safe, home-like environment, regardless of their economic status. It serves the Chicagoland area including the suburbs, and with our distinct focus of ethnic, culture and spiritual needs of the Greek Orthodox community.

Project: Our original Jeron nurse call light system installed in 2002 is now obsolete and we need to replace this system. After extensive research of available products, we have determined that the Provider 790 Nurse Call System would best fit our current and future needs. This system provides both tone-visual and audio-visual components which provide us the communication, alerting and workflow tools needed to address the unique requirements of our resident and facility needs. We will be able to service our residents more promptly and efficiently, respond to emergency situations immediately, evaluate and assess our workflow and staffing concerns, monitor our residents' locations, and assure a safer environment for our residents.

Phase I and Phase II – 3rd floor

Provider 790 Nurse Call System Base		\$ 35,991
Installation Cost per room	= \$1,200	
Number of 3 rd floor rooms	= x 33	\$ 39,600
