

... with one another.

The Orthodox Church defines a person as three distinct parts unified in one created being; body, mind and soul. This is the genetic makeup of every camper and guest that visits the St. Iakovos Retreat Center. As such, the Retreat Center has a responsibility to offer holistic development of the entire person through the facility. The development of the activity fields at the St. Iakovos Retreat Center is the response and commitment to the total development of the person. Creating the space within one facility to feed the body, as well as the mind and the soul.

The Hellenic Foundation has generously joined the St. Iakovos Retreat center in a continued approach to the holistic development, as well as creating the relational space for each and every guest to meet Christ in their journey and take one step closer to Him.
